Welcome back, here we are at our fourth appointment with the ARphymedes project!

In recent months, our partnership work has moved on several fronts, if you scroll down you will find the news already available, are you curious enough?

A first look at Student Book

The Arphymedes project aims to germinate **new educational tools** that extrapolate the most authentic innovations provided by recent scientific and technological developments, making the approach to learning more **immersive** and interactive.

The study of Physics may never be the same again, with the injection of **augmented reality** (AR) to the original and traditional book. Making the content accessible, dynamic is our main aim.

What does this first version give us?

The cooperation of the partnership allows us to take a look at this new version of the Student Book.

The book will tell the story of important milestones in **physics**, take the student on an exploration of physics through time and significant events, with the opportunity to interactively test and experiment with what is presented.

Through the **history of invention** we will show the ways and strategies of scientific discoveries and highlight the importance of questioning acquired knowledge.

A clear and straightforward layout has been created, a two-page structure designed and imagined specifically to accompany the reading of the content to the exploratory journey through **AR**.

A **crucial combination** that will enhance the educational experience through the integration of media, apps, augmented reality (AR) in the classroom.

What does this first version give us?

The ARphy team is preparing for the next **Transnational Project Meeting** in Slovakia, to be held from 1 to 3 March at the University of Saints Cyril and Methodius in **Trnava**.

This will be a further opportunity for the consortium to share moments together of exchange, work, and deeper connections, and to proceed **harmoniously** to the next phases of our project.

We will share updates and news in our next newsletters

Stay tuned for more information and news!
