TPM in a wonderful atmosphere, Iași, the cultural capital of Romania!

We are pleased to tell you about the meeting that took place in Romania, hosted by the **Gheorghe Asachi Technical University of Iasi TUIASI**.

The consortium then had the opportunity to walk side by side to **explore together** and experience the energies of the place and its flavours that accompanied a way of working synergistically to make **ARphymedes** a project that will change the way physics is taught and learned.

What were the highlights?

The Iasi TPM took place on 1 and 2 June 2023.

The role of the meeting was to accelerate the completion of the chapters that make up the **Arphymedes manual**.

Consequently, the meeting was mainly attended by partners with technical and project management tasks (4 from TUIASI, 2 from Slovakia, 2 from Diadrasis and one from Viteco).

The work of the project meeting took place both on-site and in three online meetings that were scheduled in good time to allow for the presence of the other project members who were unable to attend the meeting in Iasi.

The meeting had a strong **collaborative spirit** and was characterised by the resolution of several outstanding issues.

On the second day of the meeting, a visit to the **Library** of the Gheorghe Asachi Technical University, which has housed an important collection of applied **physics books** from the very beginning, took place in the role of documentation.

What's next?

We have to thank our partners Dorin and Cristian from the Gheorghe Asachi Technical University of Iasi TUIASI for supporting us and putting a lot of heart into organising, telling us stories and showing us the immense beauty they are guardians of, and for creating the conditions for a healthy and important collaboration that leads with better awareness to the final part of the project.

Expect news, we are in the warm phase of the project, important news will soon be available

Stay tuned for more information and news!
