

To make this list was very complicated task. The book contains experiences of 30 years of teaching physics. In those years I met, discuss, and learn from many people on various meetings, workshops, and conferences. When preparing for lessons I was often looking for the best ideas how to make topics interesting and understandable. After lessons I put my remarks into materials and so it continues. What I can do now, is to put together resources I remember using, and in the same way apologize if I forgot something, or somebody.

Names of the physics teachers and enthusiasts, organizations I followed up on You Tube and  
on the Internet.

From the beginning of my practice as a physics teacher, I was looking for people who tried to  
make physics interesting for students. It all started with the first four mentioned below.

SCHOLA LUDUS Centrum pre podporu výchovy k vede a rozvoj celoživotného neformálneho vzdelávania na Fakulte Matematiky, Fyziky a Informatiky Univerzity Komenského v Bratislave - K.Teplanová, V. Haverlíková (Biznárová), A. Rohalová (Marenčáková ): <https://www.scholaludus.sk/new/index.php?go=aktuality>

Projekt Heuréka – I.Dvořáková: <https://kdf.mff.cuni.cz/heureka/kontakt/>

Jozef Beňuška -a physics teacher at the V. Pauliny-Tóth Gymnasium in Martin,

honored by the European Physical Society for Lifetime Achievement in 2017

Dianna Leilani Cowern is an American science communicator, she studied at Massachusetts Institute of technology, her channel is called – Physics Girl

Zdenek Drozd - Department of Physics Education Charles University Prague - Rande s fyzikou

Tatiana Erukhimova, a professor in Texas A&M's Physics and Astronomy department and Physics Outreach program

Arwind Gupta -an Indian toy inventor, author, translator and scientist: Toys for Science and Math Education

Derek Alexander Muller – Applied Science in Engineering Physics - YouTube channel Veritasium

Neil deGrasse Tyson – StarTalk

Jearl Walker- Physics Professor Cleveland State University - Flying Circus of Physics

Nick Weckesser - Nick Lucid – master of science in physics -The Science Asylum

Bruce Yeanny -middle school physical science teacher for 41 years

For younger children you can find interesting ideas also on Pinterest webpage.

Another valuable resource are experiential centers of science. Each country certainly has some.

Aurelum Science Adventure Center, Bratislava, Slovakia

Vida science center Brno – Czech Republic

Technical Museum Vienna, Austria

The last ones I did not use in the textbook, but I used them as an inspiration for students, to persuade them that physics is fun and it is everywhere:

Industrial folklore:

Vrbovskí vit'azi: for example:

Blue Man Group:

Students can make it also:
